Agenda

- Start the Recording
- We will start by mentioning the project's Antitrust Policy, which you can find linked from the LF and project websites. The policy is important where multiple companies, including potential industry competitors, are participating in meetings. Please review and if you have any questions, please contact your company's legal counsel. Members of the LF may contact Andrew Updegrave at the firm Gesmer Updegrave LLP, which provides legal counsel to the LF.
 - [Antitrust Policy](#)
- Agenda Bashing, Roll Call, Action Items (all, **9:00-9:05 am**)

General Topic

Other

- Freenode IRC update: ODL IRC channels are moved to Libera.chat due to spamming on Freenode, therefore it is suggested that all users to register with Lebera IRC and join channels.

- <https://libera.chat/guides/registration>

LFN actively working on a new solution based on Matrix (opensource Slack alternatives), especially for contributors in China or behind corporate firewalls who could not access all IRC services.
Bridging to IRC channels is planned to be tested in August. Matrix is designed to link Chat platforms.

- All active ODL \$projects INFO.yaml files require the IRC servers to be updated.
 - <https://git.opendaylight.org/gerrit/c/releng/builder/+/96536>
- official ODL docs fixed but waiting for releng docs and docs-conf updates to be published
<https://gerrit.linuxfoundation.org/infra/c/releng/docs-conf/+/67813>
<https://gerrit.linuxfoundation.org/infra/c/releng/docs/+/68025>
- => ODL (but also ONAP and every LFN project) docs publishing strongly depends on releng docs-conf, even for simple things such as updating copyright footers years.
We have to wait for new versions in official Py.pi for fixes to be taken into account => this induces long cycles and slow responsiveness...
<https://gerrit.linuxfoundation.org/infra/q/project:releng%252Fdocs-conf+branch:master+status:merged>
<https://gerrit.linuxfoundation.org/infra/admin/repos/releng/docs-conf,tags>
- DDF feedbacks
 - autorelease evolution and helm charts / docker ongoing works
 - lack of maintenance of some projects => we should advertize the projects concerned in Release notes + download pages to ask for contributions
