ODL Modernization

- [Proposals](#)

Proposals

- More focus on Docker / Helm
- ODL CI/CD toolchain
    - Convert JJB/yaml to CI Pipelines
    - Start with pipelines and then extend
    - Move VMs to Containers
- CSIT Framework
    - Expand beyond Robot
    - Python-based is a good option
        - example of TransportPCE functional tests presented in January DDF
            - based on pytest + requests (not described in this presentation)
            - python venv can be used to reproduce the CI tests locally without the need of heavier solutions such as Jenkins + k8s or docker...
