## Agenda

- Start the Recording
- We will start by mentioning the project's Antitrust Policy, which you can find linked from the LF and project websites. The policy is important where multiple companies, including potential industry competitors, are participating in meetings. Please review and if you have any questions, please contact your company legal counsel. Members of the LF may contact Andrew Updegrave at the firm Gesmer Updegrave LLP, which provides legal counsel to the LF.
  - [Antitrust Policy](#)
- Agenda Bashing, Roll Call, Action Items (all, 9:00-9:05 am)
- [Releases](#)
- LFN Updates
- Marketing Update
- [TSC Grievance Tracking](#)

## Minutes

### Release

- Chlorine, waiting on [Luis Gomez](#) or [Anil Belur](#) to release the distribution and [Guillaume Lambert](#) & the doc teams to update the documentation. (pending change <https://git.opendaylight.org/gerrit/c/docs/+102910> )
- Sulfur SR3 RC is still pending a couple of fixes from [Robert Varga](#) once that's done, [Daniel De La Rosa](#) will ask TSC for approval via email

[Robert Varga](#) TPCE will go managed in SR1 - will it join autorelease ? [Gilles Thouenon](#) TPCE team must be aware that only [Anil Belur](#) can perform autorelease. It is still possible to release manually when going managed.

Also [Robert Varga](#) has to take care of syncing versions across projects (especially project w/o committers)

Discussion about autorelease lacks and relevancy today. Main and probably blocking point to get out of autorelease is the CSIT.

Implications at the LFN level to update CI design to leverage k8s or Docker.

We have to pursue the discussion by email and to identify little steps to deal with that.
