Minutes

ODL Meetbot

- Andy Grimberg asking whether meetbot is still being used.
- At least one project using the meetbot - Genius.

June Virtual Developer & Testing Form

- Next meeting for the June event on 01 May 2020. Meeting on Fridays 10 am Pacific.
- More participation will be good for the planning meeting.
  - Sign up on the mailing list for the Program Committee
  - You can also indicate your representation here on the LFN wiki: https://wiki.lfnetworking.org/x/IQEQAg
- The April event was a huge success - around 500 people registered and 100% attended. Kudos to Casey Cainand others who were involved in organizing it.
- Topic Proposals for the June event can be submitted here:
  - https://wiki.lfnetworking.org/x/2QwQAg

ODL Wiki

- Currently ODL Wiki has been used as a space within the lfnetworking Confluence.
- However this causes problems - some ODL wiki pages default back to lfnetworking. Also throws off Google search results.
- Hence we are separating it out to be a standalone Confluence. Migration currently happening - should not have much downtime other than an hour or two.

Magnesium SR 1

- RC has been approved by TSC to be AR 256 and it is looking good to be released by 11 May 2020 (one week delay)

Aluminium

- We seem to be lagging around two weeks - but likely not affect the release schedule IF, we move forward with the next point..
- Integration patch will stay in https://git.opendaylight.org/gerrit/c/integration/distribution/+/89511... Robert Varga will take care of Neutron (supercommiter rights have been approved by TSC) ; Netvirt will need to catch up.
    - https://jira.linuxfoundation.org/servicedesk/customer/portal/2/IT-19610 is the ticket for supercommitter rights

SPC Meeting Points

- IT responsiveness
    - Steve Ira responded that the number of full time engineers dedicated to ODL was reduced by the LFN GB by one last year. This seems to be a news to the TSC but Casey Cainthinks it was discussed at a TSC meeting - need to investigate.
    - It seems the system has become more ticket focused than earlier method of dedicated IT engineers.
- ONAP - ODL cross community program management
    - Casey Cain will look into this - with Kenny Paul (ONAP community manager).

NetConf PTL Replacement

- Balaji is no longer working on ODL - and he was NetConf PTL. So new PTL needed.
- There is a candidate for NetConf PTL - Jamo Luhrsen. The project will decide on whether Jamo Luhrsenis acceptable 🙂

Action Items

- ☐ Abhijit Kumbhare to reach out to Balaji Varadaraju to find out his plans about ODL TSC.
