

2020-04-15 Integration Meeting Minutes

Date & Time

April, 15, 2020; 9pm PST

Agenda

- Release
- Infra
- Docs
- Misc

Minutes

Release:

- [Daniel De La Rosa](#) will send email on monday that we are code freeze for Mg SR1 on monday 4/20
- [Jamo Luhrsen](#) will dig through emails to see how often bgpcep rib-impl is failing in autorelease. It just failed again in [Mg](#)
- Aluminium is coming up on CSIT deadline (4/27) and we will need to look at integration test results soon
- [Venkatrangan Govindarajan](#) needs to provide AAA release plan for Alumium
- Netconf needs a release plan too, but nobody seems to be there for that yet

Infra:

- nothing of interest this week
- ask.opendaylight.org is being decommissioned and stackoverflow or serverfault is the goto going forward

Docs:

- nothing of interest this week

Misc:

- The MRI CSIT jobs really don't need to run on every autorelease since they are testing released code from MRI. One idea is to create a new parent job like integration-test that will run MRI CSIT periodically, like once a week.
 - [Luis Gomez](#) will take a look and maybe report something back next week.
