- Releases (**25 min**)
    - Sodium SR3
    - Aluminum
- Any Other Topics (**5 min**)
    - IT infra:
        - SSO Migration

Minutes

LFN Virtual Technical Meeting Topics

- Luis/Daniel/Lumina planning to submit some topics in the next few days.
- Abhijit Kumbhare has also reached out to Guillaume & Prem.
- Luis thinks we should look at the architecture as well.

Wiki issues and migrations of project wikis

- Casey Cain mentions that the docs intern can help on the wiki & some of the migration.
- Projects need to migrate their wiki from the wiki-archive.
- Still have some issues with the wiki.

Releases

- Sodium SR3 is approved and released. This is the last Sodium service release unless we have a security issue or some other escalation.
- Aluminum is a month behind, but it is now passing distribution since lisp and netvirt were removed. Netvirt is back but there is still a lot of work to be complete for CSIT to pass.

IT infra

- Migrate to a new SSO service in an effort to roll out a more consistent login experience across all Linux Foundation Projects Services. This login process will use sso.linuxfoundation.org and should be familiar to anyone who has logged into.
- The migration will happen next week over a 2-hour maintenance window.
- Affected Services:
  - jenkins.opendaylight.org/releng
  - jenkins.opendaylight.org/sandbox
  - jira.opendaylight.org
  - wiki.opendaylight.org

Action Items

- ☐ Abhijit Kumbhare to reach out to Balaji again.

- ☑ Abhijit Kumbhare to forward Daniel De La Rosa's email to Achuth about Neutron to the appropriate person to get action.
