2020-03-04 Integration Meeting Minutes

Date & Time

March 4th, 2020; 10 pm Pacific

Agenda

- Start the Recording
- Any Other Topics (**5 min**)

Minutes

Release:

- Magnesium being blocked by
  - ⬤ ~~OPNFLWPLUG-1085~~ **- switch-idle-timeout does not work** `RESOLVED`
    - **bug is fixed and merged. need to just close the jira**
  - ➕ ~~BGPCEP-365~~ **- https://tools.ietf.org/html/draft-ietf-idr-bgp-ls-segment-routing-ext-01 BGP-LS topology provider support for Segment Routing** `RESOLVED`
  - it looks like we will have a delay in release
  - autorelease seems healthy
  - 5th and final issue in 🔖 ~~INTTEST-68~~ - Magnesium pre-release CSIT issues `RESOLVED` has a fix in place and just needs to be merged
  - beyond bgpcep-365, we'll need a passing autorelease to use as a release candidate then hope there are no surprises in the distribution-test job

Infra:

- **Jenkins plugins had some updates recently and there were some hiccups, but all seem to be resolved now. Any missing plugins found to be missing can be addressed with a ticket to LF helpdesk**
  - **problems seem to come because lots of plugins were pinned to specific versions which caused dependency failures when everything was unpinned**
- **Thanh Ha (zxiiro) notes Latest version of robot framework will cause some problems with jenkins**
- **CSIT jobs are also now collecting logs after a few days without**

- **ODL Plastic is blocked because their staging repos are unable to close due to a nexus IQ check. releases version is 2.1.7, but the block seems to be reporting against released version 2.1.6**
  - **also, new check to prevent these releases seems to be a new restriction that was introduced recently, but we are unsure if this was on purpose and/or was not communicated**
  - **Anil Belur notes that the plastic issue is security related.**

Docs:

- **The release schedule will be updated to reflect what is now being worked on in latest docs page**

Action Items

- ☑ Anil Belur to figure out how the nexus IQ check was enabled and if it was on purpose, and hopefully report to TSC in tomorrow's meeting
- ☑
