## Minutes

- MRI bump done and all projects (e.g., netvirt, lisp, genius) are back in the distribution.
  - next step is to dig through CSIT failures and see what the problems are. One problem is going to be the new segmented journal and we will have to fix up CSIT in those places.
- discussion about [callhome bug \(netconf\)](#) which seems to be timing and 3rd party related. Ideas for fixing in CSIT are there in the jira.
