2020-07-22 Integration Meeting Minutes

Date & Time

July, 22nd, 2020; 9pm PST

Agenda

- Release
- Infra
- Docs
- Misc

Minutes

Release:

- **Mg-SR2 had a blocker bug in an MRI. The bug is fixed but now we need an MRI bump**
  - **Jamo Luhrsen waiting on super committer rights to finish the version bump**
    - **Thanh Ha (zxiiro)can pick up the version bump work as well**
  - **release is delayed by aprox a week now... original date was 20 Jul 2020**
- **Aluminium no longer has project blocker bugs, but some failures we think are due to test code bugs. Ideally those can get fixed as well. 03 Aug 2020 is Aluminium code freeze**
- **Sodium SR4 is hopefully on track for the end of August 24 Aug 2020 for SR4 code freeze**

Infra:

- **All infrastructure issues are believed to have been resolved now that global-jjb has been updated and the race condition for port delete has been resolved**
- **looks like our effort to reduce job costs in the past month or two has been successful and we may see further reduction after a full month of jobs from recent changes**

Docs:

- **no updates this week**
