

2020-08-31 Meeting notes

Attendees

Casey Cain Chetan Arakere Gowdru Daniel De La Rosa Jamo Luhrsen Manoj Chokka Thanh Ha (zxiro) Abhijit Kumbhare Venkatrangan Govindarajan @Dhinua Dayalan @Yaojun Zeng @Sarguna Dharani [daya kamath](#) @Sanjay Nayak

Agenda

- Start the Recording
- [Antitrust Policy](#)
- General Topics
 - Knowledge Session

Minutes

[Jamo Luhrsen](#) shared information on the Integration/Test Project

- Showed how the test plans are formed and provided examples of how to modify tests.
- Explained how Jenkins and Releng relate to test.

[Luis Gomez](#) share information on Integration/Dist

- Explained how the project is built and the difference between Managed and Self-managed workflows.
 - Noted that self-managed projects that do not use Karaf do not need to be in the Int/Dist pom
 - The <scope>test</scope> tag will not list the feature in Karaf
 - The only real failure is usually related to making sure that the version is correct in the pom.
 - Managed projects are mostly handled by the LF build system and requires little maintenance.
 - Showed how to add new projects to the managed distribution.
- Self-Managed distribution happens 1 week after the Managed release.
 - Managed release is tested via the autorelease automatically.
