Releases

- Sodium
  - Since Aluminium is complete, Sodium is on End of support and Anil Belur will remove it accordingly
- Aluminum -
  - Release is complete. Asking self-managed projects to proceed with release and also managed one to produce release notes .. Checklist for reference
  - Aluminum release notes: https://wiki.opendaylight.org/x/vREF.
  - Please make sure that the marketing messaging is submitted by the end of the week so that we can prepare messaging for the ONES timeframe.
- Silicon
  - Schedule to release will continue as planned. Release Schedule for Silicon... Daniel De La Rosato update schedule with the help of Thanh Ha (zxiiro)

ODL Survey

- A brief discussion was had about the survey. It was suggested that there should be more options for write-in questions and have the option for "others" where appropriate.
    - Should the survey be arranged by use case?
    - This can be discovered when it is in a more "collaborative friendly" format.

ODL Community

- There was a discussion about the community engagement going down significantly for the last one year. A few points:
    - Most topics get discussed only in the TSC meetings with no in-between discussions over mailing lists.
    - Attendance at technical/project meetings like the kernel projects call & integration call has dwindled to the point there is no participation in some of those.
        - Example: Integration Project call got canceled and merged into the TSC call.
    - Questions from newcomers not being answered on the mailing lists.
        - Casey Cain has a few suggestions about merging this into Confluence platforms. But among the core issues remain is people answering these.
        - Manoj Chokka sees questions on other forums like stack overflow related to ODL which go unanswered as well.

Action Items

- ☑ Abhijit Kumbhare or Daniel De La Rosa to follow up with the managed projects about their release plans JIRA tickets for Silicon 18 Sept 2020
