2021 ODL TAC Representative Election

The role of the Technical Advisory Council is to facilitate communication and collaboration among the Technical Projects in the LFN.

TAC Representative Responsibilities

- Coordinating collaboration across technical projects
- Making recommendations to the Finance Committee of resource priorities for Technical Projects
- Electing TAC representative to the governing board
- Setting processes/procedures for the election of "committer representative" to the LFN Governing Board
- Other matters related to the technical role of the TAC that may be communicated to the TAC by the LFN Governing Board

Find more information about the TAC here: https://wiki.lfnetworking.org/x/5AAF

Election Dates

Nomination period: 08 Jan 2021 to 21 Jan 2021 and close by b 5pm PT.

The voting period will last 2 weeks from the close of the nomination period.

Candidates

All OpenDaylight Committers are eligible to run and will be approved by the TSC. If you are interested in self-nominating, please indicate so below.

Robert Varga

- Photo:

- Bio:

Robert has been involved in OpenDaylight from its start, having co-authored the MD-SAL architecture and designing major portions of its implementation.

He is the overall top contributor on OpenDaylight and has contributed ~16% of all patches merged, touching majority of projects. He is a committer of a wide range of projects — odlparent, yangtools, mdsal, bgpcep, controller, aaa, netconf, vbd, infrautils and coretutorials.

His contributions tend to center around maven build system, overall architecture and high-level design (BGP, PCEP, OpenFlow Boron design, Virtual Bridge Domain), performance/stability-critical pieces of infrastructure and high availability.

His current focus is platform core use cases and related development.
