## Agenda

- Start the Recording
- We will start by mentioning the project's Antitrust Policy, which you can find linked from the LF and project websites. The policy is important where multiple companies, including potential industry competitors, are participating in meetings. Please review and if you have any questions, please contact your company's legal counsel. Members of the LF may contact Andrew Updegrove at the firm Gesmer Updegrove LLP, which provides legal counsel to the LF.

## Minutes

### Release

- Silicon SR2 CSIT AR failures are empty but we have some MRI regressions. [Venkatrangan Govindarajan](#) and [Robert Varga](#) and/or TSC will review this, so we can then move fwd with the release
- Phosphorus is on still on schedule. Code freeze/cut branch is scheduled for 05 Aug 2021

### Infra

- Migrate Jenkins (releng & sandbox) secured managed config files into JCasC config. This will not have any impact on the jobs or releases.
- IT-22529: Stack creation failures were a result of the quota limits reached on the cloud provider. Do we need to increase the quota limits for ODL? Looking for inputs from [Robert Varga](#)
