## Introduction

[https://wiki.opendaylight.org/view/OVSDB\\_Integration:Main](https://wiki.opendaylight.org/view/OVSDB_Integration:Main)

## Trello

The Trello is at [\[1\]](#).

## Release Deliverables

Name	Description
Bug fixing	High-priority bug fixes. Bugs identified when the odl stackforge testing infrastructure is in place.
Sonar coverage	Increase unit, integration and code coverage reported by Sonar to improve code quality and stability
Tempest coverage	Enable more Tempest test coverage
AD-SAL Deprecation	Deprecate AD-SAL dependencies
MD-SAL OVSDB	Add MD-SAL interface to OVSDB

## Release Milestones

Milestone	Offset 2 Date	Deliverables		
M1	1/8/2015	<b>Name</b>	<b>Status</b>	<b>Description</b>
		Intent to participate	<b>Done</b>	Intent to participate in Lithium Simultaneous Release
		Project Lead elected	<b>Done</b>	Project Lead election
		Test Contact specified	<b>Done</b>	Test Contact announced
		Candidate Release Plan	<b>Done</b>	Candidate Release Plan
M2	2/5/2015	<b>Name</b>	<b>Status</b>	<b>Description</b>
		Release Plan	<b>Done</b>	Final Release Plan
		Project Checklist	<b>Done</b>	Project Checklist completed
		OpenDaylight CI	<b>Done</b>	OpenDaylight CI infrastructure usage for system test
		Rackspace Test Tools Installation	<b>Done</b>	

M3	3/19/2015	<table><tr><th>Name</th><th>Status</th><th>Description</th></tr><tr><td>Functionality Freeze</td><td>Done</td><td></td></tr><tr><td>Karaf Features Defined</td><td>Done</td><td><a href="#">User Facing Features</a></td></tr><tr><td>Documentation Started</td><td>Done</td><td><a href="#">gerrit 18486</a> <a href="#">gerrit 20328</a></td></tr><tr><td>Integration and System Test Template</td><td>Done</td><td><a href="#">OVSDB:Lithium_Integration_Test</a></td></tr></table>			Name	Status	Description	Functionality Freeze	Done		Karaf Features Defined	Done	<a href="#">User Facing Features</a>	Documentation Started	Done	<a href="#">gerrit 18486</a> <a href="#">gerrit 20328</a>	Integration and System Test Template	Done	<a href="#">OVSDB:Lithium_Integration_Test</a>

Release patch		Release patch to the stable/lithium branch and bump versions																				

SR2 Release	9/24/2015	<b>Name</b>	<b>Status</b>	<b>Description</b>
		Release patch		Release patch to the stable/lithium branch and bump versions

## Externally Consumable APIs

Artifact	Status	Description
OvsdbInventoryListener	Stable	Existing apis to perform OVSDb crud operations
Southbound	Tentative	MD-SAL OVSDb crud operations

## Expected Dependencies on Other Projects

Providing Project	Deliverable Name	Needed By	Acknowledged?	Description
controller	features	M3	No	basic controller features
odlparent	features	M3	No	odlparent values
openflowplugin	features	M3	No	flow programming and extensions
yangtools	features	M3	No	yangtools for compiling yang

## Expected Incompatibilities with Other Projects

OVSDb is considered incompatible with applications that program the flow tables on vSwitches. This includes:

GBP  
OpenDOVE  
VTN

These projects have not held discussions as to how to become compatible because they each provide their own solution to the same problem.

## Compatibility with Previous Releases

### Removed APIs and/or Functionality

The BridgeDomain APIs are removed since they were deprecated in Helium. The APIs were not used.

### Deprecated APIs and/or Functionality

The OVSDb northbound API might be deprecated depending on the outcome of the AD-SAL deprecation. The APIs currently use some AD-SAL dependencies.

### Changed APIs and/or Functionality

## Themes and Priorities

- Increasing unit and integration test coverage to improve code quality
- Deprecate AD-SAL dependencies
- Provide an MD-SAL interface to OVSDb for crud operations

## Requests from Other Projects

### Active Requests

- **Requesting Project:** VPN Service
- **Providing Project:** OVSDb
- **Requested Deliverable Name:** OVSDb interface
- **Needed Milestone:**
- **Requested Deliverable Description:** We only require the ability to query and instantiate non-OpenFlow information such as ports, bridges, tunnels etc.
- **Response:**
  - **Description:**

- **Resources From:**
  - **Link to Section in Requesting Project Release Plan:**
  - **Link to Section in Providing Project Release Plan:**
- **Negotiation:**

- **Requesting Project:** VTN
- **Providing Project:** OVSDDB
- **Requested Deliverable Name:** OVSDDB interface
- **Needed Milestone:**
- **Requested Deliverable Description:** We only require the ability to query and instantiate non-OpenFlow information such as ports, bridges, tunnels etc. We prefer the existing OVSDDB plugin OVSDDBInventoryListener interface and not an md-sal interface due to time constraints.
- **Response:**
  - **Description:**
  - **Resources From:**
  - **Link to Section in Requesting Project Release Plan:**
  - **Link to Section in Providing Project Release Plan:**

- **Requesting Project:** SFC (<https://lists.opendaylight.org/pipermail/sfc-dev/2015-January/000659.html>)
- **Providing Project:** OVSDDB
- **Requested Deliverable Name:** MD-SAL OVSDDB
- **Needed Milestone:** M2
- **Requested Deliverable Description:** Working MD-SAL OVSDDB SB plugin for communicating SFC information to node. Independent of netvirt.
- **Response:**
  - **Description:**
  - **Resources From:**

- **Requesting Project:** GBP (<https://lists.opendaylight.org/pipermail/release/2015-January/001148.html>)
- **Providing Project:** OVSDDB
- **Requested Deliverable Name:** MD-SAL OVSDDB
- **Needed Milestone:** M2
- **Requested Deliverable Description:** Working MD-SAL OVSDDB SB plugin for communicating to node independent of netvirt. We only require the ability to query and instantiate non-OpenFlow information such as ports, bridges, tunnels etc. This is probably a duplicate of the SFC request.
- **Response:**
  - **Description:**
  - **Resources From:**
  - **Link to Section in Requesting Project Release Plan:**
  - **Link to Section in Providing Project Release Plan:**
- **Negotiation:**

## Test Tools Requirements

This project plans on using System Test (ST) inside OpenDaylight cloud. In particular, the integration piece of OVSDDB's net-virt will require an Openstack Installation that uses ODL as the Neutron ML2. It is the goal to integrate with both Icehouse and Juno.

Update: Flaviof talked with Than and is currently convinced that the infra provided by jjb and sandbox is all that will be needed in terms of infrastructure to have automated tests on OVSDDB functionality in Lithium. The plan will utilize VMs of the label 'dynamic\_devstack'.
